According to Japan Custom and Tariff Bureau, Manifest submission will be rejected in Custom system of NACCS if HS code dose not belong to the data set in Custom website. We kindly request you to remark the correct HS code in Shipping Instruction at the first time when you submit to SITC to avoid the unnecessary delay.

NVOCC (Non Vessel Operating Common Carriers) also need to submit the Manifest of House Bill as per the requirement of Japan Custom. Please be advised that SCAC (Standard Alpha Carrier Code) in NACCS of SITC Container Line is **12PD**.

We thanks for your continuous support and please do not hesitate to contact to our Customer service Dept & Documentation Dept if any questions. We will also keep you updated if any further
